DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see page 7 line 1-13, filed 10/23/03, with respect to fig 1. have been fully considered and are persuasive. The non- final rejection has been withdrawn.

Allowable Subject Matter

2 Claims 1,3-21 are allowed.

3. The following is an examiner's statement of reasons for allowance: The following is a statement of reasons for the indication of allowable subject matter: prior art fails to show a roller bearing mechanism operably connected to the second end portion of the shaft, the roller bearing mechanism having a rotatable inner race operably connected to the shaft, on one side of the shaft side, and an outer stationary race, and a plurality of ball bearings positioned between the inner and outer races; and an axial thrust generating device having a tapered sliding member supported for movement in a radial direction relative to the shaft and supported at an opposite end of the shaft from the support bearing so that axial force can be applied to the shaft through the roller bearing mechanism in the direction of the support bearing by moving the tapered sliding member radially. Prior art also fails to show an axial thrust generating located on an opposite end of the armature shaft from the support bearing and possessing a tapered sliding member supported in the housing for movement in the radial direction relative to the armature shaft and supported against the armature shaft so that axial force can be
